1 MODEL OVERVIEW

1.1 DESCRIPTION

This document details the 3-Dimensional (3D) models of US Civilian Adult Female characters. The US Civilian Adult Female character models can be used with and without weapons and with a set of animations (see the specific weapons and animations Model Description Documents for more information). Weapons are attached and detached from the US Civilian Adult Female character models at specific attach points. During runtime weapons are attached and detached to the model by the visualization system that controls the 3D model. These models can be used with any visualization system that can import FBX or COLLADA formats.

The US Civilian Adult Female character models were developed by Dignitas Technologies for the Underground and Urban Sim projects. The models designs were based on reference images found on the internet. To meet the project performance requirements, medium fidelity models were developed.

The US Civilian Adult Female character models components include:

- Tshirt
- Ballet Flats
- Jeans or Skirt

1.3 MODEL VERSION AND HISTORY

Information about the model version can be found in the “Model_Version.txt” file located in the model’s directory (same directory the model’s .fbx file is located).

1.5 LICENSING/RIGHTS

Models built by Dignitas Technologies along with all files and documentation, have full Government Purpose Rights.

2 MODEL ATTRIBUTES

2.1 POLYGON ALLOCATION

Polygon allocation is the number of triangles and vertices for a given state and Level of Detail (LODs) in the model. The method for calculating the number of polygons is to gather each model state then count the polygons present in each representation. Animations are not included in the polygon allocation. The US Civilian Adult Female character models have a single LOD which is labeled LOD0.

Table 3 Polygon Allocation

Model	# of Triangles	# of Vertices
Adult Female 1	3478	1800
Adult Female 2	3188	1670
Adult Female 3	3478	1800
Adult Female 4	3188	1670

2.2 LEVEL OF DETAIL (LODS)

Dignitas supports only one LOD (LOD0) and no switch distances at this time.

2.3 TEXTURE MAPS

2.5 HEALTH STATES

For more information on the Incapacitated and Killed States refer to their respective MDDs.

2.6 SKELETAL STRUCTURE

2.6.1 JOINTS IN THE RIG

A **rig** is a skeleton that attaches to the 3D model to allow for animations to be added. The **joints** in the rig hold the translation and rotational data from the animations.

Naming convention for joints:

Table 4 Naming Convention for Joints

Hips	RightForeArm
Spine	RightHand
Spine1	RightThumbBase
Neck	RightThumbTip
Head	RightHandTip
HeadEnd	LeftUpLeg
LeftShoulder	LeftLeg
LeftArm	LeftFoot
LeftForeArm	LeftToeBase
LeftHand	LeftToe
LeftThumbBase	RightUpLeg
LeftThumbTip	RightLeg
LeftHandTip	RightFoot
RightShoulder	RightToeBase
RightArm	RightToe

2.6.2 ATTACH POINTS AND ATTACH MODELS

The model rig and the **Attach Model** (e.g. weapons, cell phones, etc) both have **Attach Points** where they can be connected (“attached”) during runtime. **Attach Points** are unweighted joints on the model rig that represent locations where **Attach Models** can be connected. Attachments occur during runtime

based on the animation applied to the model rig. Table 5 lists all Attach Points, associated Attach Models, and corresponding animations for this character model.

Table 5 Attached Models

Attach Point (on Rig)	Attach Model	Animations
RightHandWeaponAttach	None	All stowed animations
RightHandWeaponAttach	None	All WeaponFiring animations
RightHandWeaponAttach	None	Incapacitated and Killed animations

3 ANIMATIONS

The animations associated with this character are shown below. For additional animations compatible with this character, or more information on those listed above, please refer to the Animation MDDs.

- Walking
- Running
- Covering
- Crawling
- Standing
- Kneeling
- Prone
- Incapacitated
- Crouching
- Killed

4 VERIFICATION APPROACH

4.1 RUNTIME SYSTEMS

This 3D model, associated accessories and weapons, and animations were tested using the following:

- Veritas 3D Viewer v1.13
- Veritas Model Viewer v1.4
- FBX Viewer 2013.3
- Unity3D

5 LIMITATIONS

No known issues.
